Abstract: During the 1970-1977, many research and studies were conducted on the origin, structure, nature and evolution of the creation and a cosmology was developed by me in 1977 with hundreds of doctrines by considering several facts about the appearing universe, atom, photon, space, universe and all physical laws along with good stuff of all the theories. According to my cosmology, the cosmos is an enormous-mixed compound of universes, galaxies, stars, planets, atoms, electrons, protons, neutrons etc. that are created by each other, embedded one in each another, extended in ascending and descending order infinitely, with similar structure and properties in the state of cosmic-plasma.

Introduction:

There are many theories on the origin, structure, nature, and evolution of the cosmology in the time-line of old, and modern theories, ideas, and discoveries from ancient time to present day. Some of the best minds in history—both philosophers and scientists—have applied themselves to an understanding of just what the universe is and where it came from, suggesting in the process a bewildering variety of theories and ideas. Every theory is good and also not every theory can describe the universe and could not explain the universe indefinitely. Regarding the occurrence of cosmology, the cosmology, there are many cosmological theories & hypotheses, inventions & discoveries and prepositions & phenomena. We should define the cosmology in terms of things made by scientists. There are many myths, mysteries, truths, beliefs in the cosmology that current theories can not explain. Some issues in the universe that are theoretical, meaning that existing theories seem incapable of explaining a certain observed phenomenon or experimental result. The others are experimental, meaning that there is a difficulty in creating an experiment to test a proposed theory or investigate a phenomenon in greater detail. Some pertain to one-off events, unusual occurrences that have not repeated and whose causes therefore remain unclear. Knowledge of the universe has speed up in the past years—but big questions linger. Certainly our current understanding of the universe leaves some unanswered questions. Yet no one knows for sure what is the cosmos, we have no way of knowing what lies outer the observable universe and inner the unobservable universe I.e. photon. Mysteries of the cosmology are only to be expected. What mysteries

are the cosmos hiding from us ? There are many theories explaining these cosmic mysteries; origin, structure, nature and evolution of the cosmology in the time-line of old, and modern theories, ideas, and discoveries from ancient time to present day. Every theory is good and also not every theory can be described the universe completely and could not explain the universe indefinitely.

During the 1970-1977, many research and studies were conducted by me on the origin, structure, nature and evolution of the creation and a cosmology was developed in 1977 with hundreds of postulates by considering several facts about the appearing universe, atom, photon, space, universe and all physical laws along with good stuff of all the theories. According to my cosmology, the cosmos is an enormous-mixed compound of universes, galaxies, stars, planets, atoms, electrons, protons, neutrons etc. that are created by each other, embedded one in each another, extended in ascending and descending order infinitely, with similar structure and properties in the state of cosmic-plasma

A New Model of Cosmology:

According to my cosmology- The cosmos is made up of similar universes in infinite number, having similar external and internal, structure and properties; embedded one in each other and extended in ascending and descending order. To explain and justify this model, there are three universes so far known to us (a) Geo-universe that means the universe seen around our earth, (b) Atomic-universe that means the atoms from hydrogen to uranium, (c) Photon-universe that means photon, the particles related to energy. These three are having similar external and internal, structure and properties; embedded one in each other and extended

in ascending and descending order. Of these three, we have known some extent about the internal structure and properties of the Geo-Universe, but we do not know its external structure. We know some extent about the external structure and properties of the Photon-universe, but we do not know its internal structure. Between of these three universes, we came to know a large extent about the internal and external, structure and properties of the Atomic-universe. Hence, I have taken the similarities of the internal structure and properties between the Geo-universe and Atomic-universe to propose that all the universes in ascending and descending order of the creation are having similar internal structure and properties. The similarities of external structure and properties between the Atomic-universe and Photon-universe are taken to propose that all the universes in ascending and descending order of creation are having similar external structure and properties. And the manner in which of these three universes "i.e" embedded one in each other, extended in ascending and descending order to propose that all the universes in ascending and descending order of the creation are embedded one in each other and extended in ascending and descending order. This doesn't mean that these photons, atoms, universes are arranged one on another as cycles separately. According to my cosmology, the cosmos is an enormous-mixed compound of universes, galaxies,

stars, planets, atoms, electrons, protons, neutrons etc. that are created by each other, embedded one in each another, extended in ascending and descending order infinitely, with similar structure and properties in the state of cosmic-plasma.

2.Similar universal structure & properties:

Of these three, we known some extent about the internal structure and properties of the Geo-universe but we do not know its external structure and properties. We know some extent about the external structure and properties of the Photon-universe but we do not know its internal structure and properties. Between of these three universes, we came to know a large extent about the internal and external, structure and properties of the Atomic-universe. So, I have taken the similarities of internal structure & properties between the Geo-universe & Atomic-universe to propose that all universes in ascending and descending order of the cosmos are having similar universal internal structure and properties. The similarities of external structure & properties between the Atomic-universe and Photon-universe are taken to propose that all the universes in ascending and descending order of cosmos are having similar universal external structure and properties.

r.

Similar External Structure & Properties

According to the model, all the universes in ascending and descending order of the creation are having similar external structure and properties. All the universes in either ascending or descending order of creation have the similar external structure and properties. So, we have imagine the external structure and properties of the atom compare with the external structure and properties of the photon. In the same way, imagine the photon external structure and properties compare with the external structure and properties of the atom. Because, according to my cosmological principle all the universes in the ascending and descending order of creation must have similar external and internal structure and properties. To explain and justify this, I have taken many similarities between the atom and photon. To justify this, I have taken many similarities between the atom and photon.

For example:-

Atomic-Universe	Photon-Universe
1) The atom appearing in several forms such as Hydrogen to uranium etc., being due to the Internal structure having different atomic particles at various numbers	2) The particle "Photon" related to energy appearing in several forms such as radio waves, gamma rays, violet rays etc being may be probably due to the internal structure having different particles at various numbers.
2)The atom exhibiting several physical and chemical Properties such as weight, colour, taste, hardness etc being due to the internal structure having different particles at various number.)The particle "photon" related to energy exhibiting properties such as wave length colour, temperature etc being may be Probably due to the internal structure having different particles at various number.

SIMILAR INTERNAL STRUCTURE & PROPERTIES

According to the model, all the universes in ascending and descending order of the creation are having similar internal structure and properties. All the universes in either ascending or descending order of creation have the similar internal structure and properties. So, we have imagine the internal structure and properties of the atom compare with the internal structure and properties of the Geo-universe that's the universe seen around our earth. . In the same way, imagine the internal structure and properties of the Geo-universe, compare with the compare with the internal structure and properties of the atom. Because, according to my cosmological principle all the universes in the ascending and descending order of creation must have the similar external and internal and structure and properties. To explain and justify this, I have taken the many similarities between the atomic-universe and Geo-Universe.

Atomic-Universe	Geo-Universe
1) Various atomic particles at different sizes in several numbers are present in the atom	1) Various astronomical objects at different sizes in several numbers are present in the Geo- Universe
2) These atomic particles having three types of charges at negative, positive and neutral states are present in the atom	2) These astronomical objects having three type of charges at positive, negative and neutral states are present in the Geo-Universe
3) Positively charged protons are present in the nucleus	3) Stars built by atoms having positive charged nucleus are present in centre of the Geo-Universe
4) Neutrons at neutral state are present in the Nucleus.	4) Planets at neutral state are present in Centre of the Geo – Universe
5) Negatively charged electrons are present at large distance of the atomic nucleus in the atom	5) Here is a concept that anti-matter cosmic bodies built by atoms having negatively charged nucleus are present at large distance of the Geo-Universe.
6) Additional neutrons called isotopes are present.	6) Additional planets called satellites around the planets are present
7) Radiation emitting from the atom.	7) Cosmic rays emitting from the Geo- Universe.
8) There is a property of nuclear fission is in the atom.	8) There is a property of super Nova is in the Geo -Universe.

Descending order of cosmos:

The Geo-universe that means the universe seen around our earth is having magnificent structure and properties such as galaxies, stars and planets etc. resembling to the Atomic-universe and Photon-universe. Such Geo-universe being built by universes of its descending order of creation that means atoms. Atomic-universe that means the atom present in several forms from hydrogen to uranium etc. is another gigantic universe, having magnificent structure and properties such as electrons, protons, neutrons, etc. resembling to the Geo-universe and Photon-universe. Such Atomic-universe being built by universes of its descending order of creation that means the photon, the particle related to energy.

The Photon-universe that means the photon, the particle related to energy present in several forms of electromagnetic radiation is also another gigantic universe, having magnificent structure and properties resembling to Geo-universe and atom. Such Photon-

universe may also being built by universes of its descending order of creation that is not yet known to us.

Thus, the descending order of creation continuous infinitely.

Ascending order of cosmos:

The Photon-universe that means the "photon", particle related to energy having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that means atom. All components in the atom are built by these "photons" in infinite number. Such each and every energy particle "photon" in the Atomic-universe is basis to an infinite descending order of creation.

The Atomic—universe that means the "Atom" having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that means in our Geo-universe. All components in the Geo-universe such as stars, planets etc., are built by these atoms in infinite number. Such

each and every atom in the Geo-universe is basis to an infinite descending order of creation.

The Geo-Universe that means the “universe” seen around our earth is a gigantic universe that is known to us, having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that is not yet known to us. All components in that universe are built by these Geo-universes in infinite number. Such each and every Geo-universe in that ascending creation is basis to an infinite descending order of creation.

Thus, the ascending order of creation continuous infinite.

Other justifications:

The cosmological principle is a fundamental principle and assumption of cosmology stating that, on a large scale, the universe is both homogeneous and isotropic, in the words, the cosmological principle posits a relatively uniform universe.

The perfect cosmological principle is an extension of the cosmological principle, and states that the universe is homogeneous and isotropic in space and time. In this view the universe looks the same everywhere (on the large scale), the same way as it everywhere (on the large scale), the same as it always has and always will.

According to the universality of physical laws, all parts of the universe are subject to the same simple laws of nature that we find here on the earth, planets, stars, and galaxies move according to the same laws of gravity that governs the flight of a baseball. Light from distant galaxies reveals the same atomic and nuclear physics that we observe in our laboratories.

Research and analysis:

Universal similarities: According my theory, there are three universes so far known to us (a) Geo-universe (b) Atomic-universe (c) Photon-universe. These three are having similar structure and properties. Of these three, we have known some extent about the internal structure and properties of the Geo-universe, but we do not know its external structure. We know some extent about the external structure and properties of the Photon-universe, but we do not know its internal structure. Between of these three universes, we came to know a large extent about the internal and external structure and properties of the Atomic-universe. Hence, I have taken the similarities of external structure and properties between the Photon-universe and Atomic-universe to propose that all the universes in ascending and descending order of the creation are having similar external structure and properties. The similarities of internal structure and properties between the Atomic-universe and Geo-universe are taken to propose that all the universe in ascending and descending order of cosmos are having similar internal structure and properties.

Uniform comparisons between atom and photon:

The similarities of external structure and properties between the atom and photon are taken to propose that these two are having similar internal structure and properties.

Structure: The Atom appearing in several forms such as hydrogen to uranium etc. being due to the internal structure having different atomic particles at various number. In the same manner the “photon” related to energy appearing in several forms such as radio waves, gamma rays, violet rays etc. being may be probably due to the internal structure having different particles at various numbers.

Properties: The atom exhibiting several physical and chemical properties such as weight, color, taste, hardness etc. being due to the internal structure having different particles at various number. The “photon” related to energy exhibiting properties such as wave length color, temperature etc being may be probably due to the internal structure having different particles at various number.

Various atomic particles at different sizes in several numbers are present in the atom. Various astronomical objects at different sizes in several numbers are present in the Geo-universe.

Uniform comparisons between Atom and Geo-universe: The similarities of internal structure and properties between the atom and Geo-universe are taken to propose that these two are having similar internal structure and properties.

1. Various atomic particles at different sizes in several numbers are present in the atom. In the similar way various astronomical objects at different sizes in several numbers are present in the Geo-universe.
2. These atomic particles having three types of charges at negative, positive and neutral states are present in the atom. In the similar way, these astronomical objects having three type of charges at positive, negative and neutral states are present in the Geo-universe.
3. Positively charged protons are present in the nucleus. In the similar way, stars built by atoms having positive charged nucleus are present in center of the neutrons at neutral state are present in the nucleus. In the similar way, planets at neutral state are present in center of the Geo-universe.
5. Negatively charged electrons are present at large distance of the atomic nucleus in the atom. In the similar way, there is a concept that anti-matter cosmic bodies built by atoms having negatively charpractnucleus are present at large distance of the Geo-universe.
6. Additional neutrons called isotopes are present. In the similar way, additional planets called satellites around the planets are present.
7. Radiation emitting from the atom. In the similar way, cosmic rays emitting from the Geo-universe.
8. There is a property of nuclear fission is in the atom. In the

similar way, there is a property of super-nova is in the Geo-universe.

Study and discussion:

The Cosmology is one of the most creative and bizarre areas of science, concerned with the studies of origin, structure, nature and evolution of the universe. There are two main theories, steady state theory and the terms Theory, that explain the structure of the universe. For example, The Big Bang Theory has faced many criticisms by many scientists as being inadequate to explain the relativity and complexity of the universe. Therefore, it is not sufficient to correctly model the origins of the universe.

According to Bud Rapanault (quora); 'The Big Bang Theory is essentially unscientific because the physical model it presents does not resemble the cosmos we observe in any of its particulars. None of the distinguishing features of the Big Bang Theory are part of the cosmological landscape that lies before us. The Big Bang Theory itself and the *ad hoc* inflationary epoch are unobservable by terms of the model.

Curved and expanding space time cannot be directly detected but are integral to the model.

The Big Bang Theory model requires that 95% of the universe consist of some dark matter and dark energy neither of which can be empirically detected and both of which are simply additional *ad hoc* patches necessary to make the model predictions conform to physical reality.

In addition, the Big Bang Theory rests on two assumptions, one simplistic and naïve, the other dubious

The cosmos is a unified, coherent, and simultaneous entity.

The cosmological redshift is a recessional velocity.

According to George Yool (quora); current evidence like the cosmological principle, Hubble ultra deep field and alternatives like quantum relativity suggest a universe has no beginning or end in which big bangs are galactic processes we can observe empirically. There are many esteemed critics such as;

NASA WMAP beyond big bang theory;

Einstein evolving universe.

Hoyle The Bang Theory got its name from a man who thought the theory was total nonsense.

Plus 34 more famous scientists around the world in an open joint letter to the scientific community has been criticized the Big Bang Theory (Big Bang Theory Busted By 33 Top Scientists) Rense.com

Doctrines:

After many researches and studies on the origin, structure, nature and evolution of the cosmos, I proposed that:

The cosmos is made up of similar universes in infinite number that are having similar structure and

properties, embedded one in each other and extended in ascending and descending order in the form of a super fluid of spacetime. There are three universes so far known to us (a) Geo-universe that means the universe seen around our earth, (b) Atomic-universe that means the atoms from hydrogen to uranium, (c) Photon-universe that means the particles related to energy. These three are individual universes, having similar external & internal and structure & properties, embedded one in each other and extended in ascending and descending order. Geo-universe, that means the universe seen around our earth is a gigantic universe, having magnificent structure and properties such as galaxies, stars, planets etc. There are continents, oceans, countries and living beings on some planets in our Geo-universe. Such gigantic geo-universe is a little atom in its ascending world. That means our universe is in that ascending world just as atom is in our universe. We do not know whether our Geo-universe is in the air, water or elsewhere in that ascending world. In my opinion, our Geo-universe is in an intelligent creature in that ascending world. But what is not known to that creature in that ascending world is that there are galaxies, stars, planets and human worlds in their atoms. In their view it is thought that there are tiny particles in their atoms. But they do not know that there are galaxies, stars, planets and human worlds in their atoms just as we think that there are electrons, protons, neutrons in our atom. But we do not realize that there are galaxies, stars, planets and human worlds in the atom. In the same way as we think, they do not know that there are galaxies, stars and planets etc. in the atom of their universe. Such Geo-universe being built by universes of its descending order of creation that means our Geo-universes and the same time being act as a primary syntactic unit in its ascending order of creation that is not yet known to us. Atomic-universe, that mean the atom present from hydrogen to uranium etc. is a gigantic universe, having similar structure and properties such as galaxies, stars, planets in the form of electrons, protons and neutrons exactly similar to our universe. Just as there are continents, oceans, countries and human beings on some earth-like planets in our Geo-universe; continents, oceans, countries and living beings may be present on some neutrons in the atom. That is the atom is a vast universe as our universe. But we do not recognize them. For the creatures in the atom, in their view the atom is a great universe, but they do not know that another gigantic universe exists above them, and that their atom in which they reside is acts as a tiny atom in our universe just as we do not know that our gigantic universe is a small particle in the universe above us. There may be humans on neutrons who have civilizations like countries, governments, planes, trains, ships, motors just there are humans who have

civilizations on our planet. Such atoms being built by universes of its descending order of creation that are photons and the same atom being act as a primary syntactic unit in its ascending order of creation that is our universe.

Photon-universe, that means photon, the particle related to energy existing in several forms of electromagnetic radiation etc. is a gigantic universe, having similar structure and properties exactly similar to our universe that have galaxies, stars, planets and similar to atom that have electrons, protons and neutrons. Just as there are continents, oceans, countries and human beings on some earth like planets in our Geo-universe; continents, oceans, countries and living beings can be present on some planets in the photons. That is, the photon is a vast universe as our universe and as the atom. But we do not recognize them. For the creatures in the photon, in their view their photon is a great universe, but they do not know that there is another gigantic universe in their ascending cosmos that is atom, and there is another cosmos above the atom that is our Geo-universe. There may be humans in the photon who have civilizations like countries, governments, planes, trains, ships, motors etc. just there are humans who have civilizations on our planet. Such photon is being built by universes of its descending order of creation that are not yet known to us and the same photon is being act as a primary syntactic unit in its ascending order of creation that is atom.

The fill of structure and characteristics in the universe of the cosmos proposed as **cosmic environments**. For example the fill of structure and characteristics like galaxies, stars, planets etc in the Geo-Universe proposed as Geo-Environment, the fill of structure and characteristics like proton, neutrons and electrons etc. in the Atomic-universe proposed as Atomic-environment and the fill of structure and characteristics in the Photon-universe that means the structure in the photon that is not yet known proposed as Photon-environment.

The fill of structure and characteristics like galaxies, stars, planets, comets, meteors, asteroids, space dust including air, cyclones and all other celestial objects that are in the Geo-universe that's the universe seen around our earth is proposed as Geo-environment.

The state of structure and characteristics like protons, neutrons and electrons and all other components that are in the Atomic-universe that's atom is proposed as **Atomic-environment**.

The state of structure and characteristics that are not yet known in the Photon-universe that is the photon is proposed as **Photon-environment**.

The state of structure and characteristics in the space like galaxies, stars, planets etc in the space is proposed as **space-enAPPENDICES**.

The state of galaxies, stars, planets, nebulae, pulsars etc. at a particular region over a long period of time in the space is proposed as **space-climate**.

The state of structure and characteristics like galaxies, stars, planets and their orbits and other physical forces etc. that surrounds in the universe is proposed as **space-atmosphere**.

The fill of structure and characteristics like galaxies, stars, planets and their orbits and other physical forces etc. that surrounds in the universe is proposed as space-atmosphere, the state of galaxies, stars, planets, nebulae, pulsars etc. at a particular region over a long period of time is proposed as space-climate, the state of characteristics of space-climate like solar wind flares, asteroids etc. at a particular region during a short period of time proposed as space-weather.

The state of space atmosphere being in still proposed as "Inactive Space Region", the state of space atmosphere being in active proposed as "Active Space Region" The region of space atmosphere in which the celestial bodies are more widespread areas proposed as "Space High Pressure Area" the less widespread areas proposed as "Space Low Pressure Area".

The state of space atmosphere being in still is proposed as "Inactive Space Region".

The state of space atmosphere being in active is proposed as "**active space region**".

The region of space atmosphere in which the celestial bodies are more widespread areas is proposed as "**space high pressure area**".

The region of space atmosphere in which the celestial bodies are less widespread area is proposed as "**space low pressure area**".

Some space times happens variation of differences of pressure in the space-climate. At such a juncture, the celestial bodies and other space dust present in the space high pressure area will try to occupy the space low pressure area all at once. In this attempt, they will whirl around the space low pressure. The centre of space low pressure area itself is the black-hole and the circular whirling celestial bodies and other space dust etc. caused by the space low pressure area is proposed as Galaxy.

Some space times happens variation of differences of pressure in the space-climate. At such a juncture, the celestial bodies and other space dust present in the space high pressure area will try to occupy the space low pressure area all at once. In this attempt, they will whirl around the space low pressure area is proposed as "**space-storm**" which is galaxy.

The centre of space low pressure area itself is the **black-hole** and the circular whirling celestial bodies and other space dust etc. caused by the space low pressure area is proposed as "space-storm" that's galaxy.

Empty spaces that are space voids formed in some places in the space as a result of the movements of celestial objects where space pressure is low relative to its immediate surroundings. It is often an indicator of coming space low pressure area. As a result, a low pressure system in the space atmosphere develops when these celestial objects in the surroundings space high pressure area rushes in to fill the empty space. They will try to occupy that empty space all at once. In this attempt, the whirl around that space low pressure area due to the obstruction of centripetal force acceleration as a space-storm that is galaxy. As the celestial objects rotates, a space-eye form in the center of the space-storm that is galaxy is proposed as Black-hole. After this, the space-low pressure area filled and neutralized with celestial objects, those will be scattered that is proposed as star clusters or interstellar cloud of gas and dust.

The earth is not tilted at a constant angle of 23.5 degrees as expected so far but slightly ups and downs by 23.5 degrees and revolves in oscillating order on sun's fulcrum, which orbits the center of our galaxy tipped at an angle of 60 degrees bobs ups and downs and above and below the galactic plane is the root cause of the climate changes, seasons, monsoonal changes on the earth.

Everyone should know about the origin, structure, nature, evolution of the universe and its various properties. Since, all the hazards on the earth directly or indirectly are associated with the gravitational forces of the universe. Further, this in order to be study the hazards, study of the cosmology is needed to know about hazards. There are hazards on the earth, on other planets and there are also happening within atoms. Human beings are on the earth, are on the outside planets of the earth and also on the neutrons in the atoms. Even if the world's people appreciate or criticize me, it is fact. Hazards caused by asteroids, meteoroids, and comets as they pass near the earth, enter the earth's atmosphere, and /or strike the earth, and by changes in inter planetary ionosphere, and atmosphere. In the face of extra terrestrial hazards and events that can lead to disasters, it is important to live in a resilient community because these types of disasters are so unpredictable and depending on the size of meteorite can cause serious damage through the heat emitted during impacts with earth's surface. In addition, impact can cause earth quakes, tsunamis, wildfires, acid rains from nitrogen oxides, darkness from dust and soot and global warming. It is for this reason that staying aware and prepared at all times is extra important. This is not an implication to live in fear, but a reminder to stay educated about these types of disasters and to have a plan in place as with any other type of disaster. Before an extraterrestrial hazards/events occur, there are some steps that can be

taken to mitigate and minimize the impact. I have conducted many studies on the universe and its extra terrestrial hazards and gravitational forces and its affect on the natural hazards on the earth. A New Hypothetical Model of Cosmology will helpful to study and know the universe, extra terrestrial hazards and gravitational forces and its affect on the natural hazards on the earth.

The year to year change of movement of axis of the earth inclined at 23½ degrees from vertical to its path around the sun does play a significant role on the Earth's atmosphere and stimulates the weather. The inter-tropical convergence zone at the equator follows the movement of the sun and shifts north of the equator merges with the heat low pressure zone created by the rising heat of the sub-continent due to direct and converging rays of the summer sun on the India sub-continent and develops into the monsoon trough and maintain monsoon circulation.

Conclusion:

I would like to have an extensive discussion on my cosmology.. Many things that visible to researchers relating to beyond the extreme deep intergalactic space and expanding universe etc. are yet to be explained.

Many consultations are made with professors and scientists for their suggestions and advices. There was also taken some information from the Wikipedia. I am grateful to all of them.

Author bio:

I'm an unfortunate Indian scientist that governments did not encourage and provide research opportunities and the society throws away. They ridiculed, humiliated, beaten and pushed out to the gate when I asked to provide research opportunities. After many rejections and humiliations, I built a small lab in my house and did research and studies on the Earth sciences and made more than 10000 research papers. Among them, 1965-70:Eco-researches and studies (Lisposcope, Biolumicelles, Bioforecast etc.); 1971-79: Cosmos-researches and studies (A New Model of Cosmology etc.); 1980-87: Geo-researches and studies (Basics of Geoscope etc.); 1988-91: Meteo-researches and studies (Basics of Monsoon Time Scales etc.); 1992-2000:Astro-researches and studies (Numerical Weather Periodic Tables etc.); 2001-10: Designs of Global Geoscope projects(Zonal, Plate, Fault etc. Geoscopes); 2010-until today: Designs of Global Monsoon Time Scales(Global, Regional, Local etc. Monsoon Time Scales) etc. were important and successfully completed. However, Artificial rains for creating normal rains; Artificial storms for pouring heavy rains; Artificial underground waters for increasing ground waters; Time-Travel-Machine for traveling into the past, present future; Bio-machine for

recreating humans of past; Geo-machine for recreating humans of past, New-earth-machine for recreating the another earth in the space, Inventing life to revive living beings; Microcosm project for connecting the worlds of micro organs, atomic-worlds; Macrocosm project for connecting the worlds of space and outer space worlds etc. were uncompleted due to lack of support and opportunities. All these were angered by casteists and fanatics. In addition to all this, the doctrines published in the name of Irlapatism-Irlapati Theory of Universe in 1977 further fueled their anger. All matters pertaining to the cosmos were widely discussed in this book. Apart from these many proposed ideas to be researches by me were incorporated in this book. The postulates about the creation, existence of god, theory of evolution and my research proposals such as creating artificial rains, artificial underground waters to increase underground waters; artificial storms, travelling into the past by Time-Travel-Machine; restoring and re-creating people in the past by using new biotechnologies just like Bio-Machine; restoring and re-creating people in past by images that are preserved in the earth's magnetic field by new technologies just like Geo-Machine; traveling inner worlds of the atom and come back into the future through microcosm; traveling outer geo-worlds of the Geo-universe through macrocosm; re-creating similar earth of past of earth in the space which is embedded in the gravitational layers and go back into past time by new technologies such as space earth project etc. doctrines exposed to the anger of fundamentalists and superstitious, subsequently got into violent altercations. As a result, my lab was destroyed and copies of research notes were burned. I reported these repressions to The Revenue Divisional Officer, Amalapuram in July,1977. The Revenue Divisional Officer was conducted an inquiry about this matter. While returning from the inquiry, I was attacked by a mob and they had taken me forcibly to the village Chavadi, Ryali, there fundamentalists and superstitious people were met and where I was beat up. Followed by altercations about my thoughts in the book, they beaten and forced me to put signatures on some prepared documents, and an offence falsely framed and foisted against me. After many tortures, I was sent to the Taluk Magistrate, Kothapeta and persuaded to renounce my views and ideas. The fundamentalists and superstitious people succeeded me in sentencing. The Taluk Magistrate was declared me as a "dangerous boy and up to anything" and issued sentence to punish and handed over to the Police Station, Ravulapalem. I was arrested on July 21, 1977. A case was registered and I was kept remand in Sub-jail and remaining period interrogated periodically. I faced trials, handcuffed and led through streets during

the enquiries and court trials/hearings, and imprisoned. The trials were done from April 2, 1979 to November 20,1979. After many arguments, the Hon'ble Additional Judicial First Class Magistrate Court was found me not guilty and acquitted on November 27,1979.

However, much efforts and sacrifice did tho, I could not get government recognition and social support. My researches were ignored and darkened. I am a victim of racism and discrimination, negligence and jealousy. Throughout my life, I have experienced hardships all my life. I was abused, humiliated and beaten and pushed out when I asked to provide research opportunities. I was insulted by my race. I was tied to a pole and beaten. My thoughts and researches were subjected to the wrath of racists, casteists and fanatics as well as fellow scientists and resulted into oppression on me. My lab was invaded. Illegal cases were framed and foisted against me. I faced trials, handcuffed and led through streets police enquiries and court trials/hearings, and imprisoned. Political recommendations and officials support, cash and caste, region and religion may play a key role in giving support and opportunities, awards and rewards, respect and recognition to depressed communities. But I have no of them. I am now making my life's last journey due to disregard & despair and illness & poverty.

Appeal:

I tried to solve many unsolved scientific issues like the mystery of creation and to re-create another creation like New Earth. But, I was not provided opportunities, my research was suppressed. I am a victim of racism, discrimination, and negligence. I am now making my life's last journey due to disregard & despair and ill-health & poverty. I am now suffering from the severe asthma along with diabetes, B.P., cardiovascular diseases. Illness weakening the health and the mind slows down and forgetfulness is coming. It is not known how long I will live and when I will die, but I know my time is near. Hence, I humbly request that if world scientists have invented any technology in the future that re-create humans of the past, kindly remember and re-create me and provide an opportunity to at least work as a servant in your laboratory to complete my uncompleted goals.

Received a tipped report Taluk Magistrate Kotta Peta with the following:-
Ref: A.S. 5973/77 dt. 21.7.77 Taluk office Kotta Peta

From Sri P. Subbarao, Taluk Magistrate To The Station House Officer
Ravulapalem.

Sir, Subj: Signature - Forgery Signature - Sri G. J. Patigangadhara
of the Ravulapalem V. Report of the Revenue Inspector, Amalapuram
Ref: Report of the Sririka Revenue Inspector, Amalapuram dt. 21.7.77.

The Rev. Inspector Amalapuram, enquired and reported that Smt. Relangi Rathamma wife of Musalaiah of Nerlapalem village applied for grant of a tree (Jambun) situated on the north-west portion of her house for which house - si - Patta was granted.

On the above petition the signatures of Village Munsiff, Nerlapalem and the Rev. Inspector, Amalapuram were forged.

The Rev. Inspector, Amalapuram further reported that Smt. Relangi Rathamma in her statement deposed that the son of Sri G. J. Patigangadhara forged the signatures. As such the Rev. Inspector, Amalapuram has called for the individual and aware red in to the matter and reported that he failed Intermediate and left hand writer. He accepted that he forged signatures and the signatures of the Village Munsiff, Nerlapalem and the Rev. Inspector, Amalapuram. He is a very dangerous boy and is upto anything.

In the above case Sri G. J. Patigangadhara of Ravulapalem village, the offender in the instant case may be dealt with according to law. Please intimate the action taken in the matter.

- 1. The following records are enclosed here with duty officer and enclosed.
 - 2. Slip containing forged signature.
 - 3. Statement recorded from Sri G. J. Patigangadhara of Pallaiah of Nerlapalem village.
 - 4. Statement of Smt. Relangi Rathamma wife of Musalaiah of Nerlapalem village.
 - 5. Report of the Rev. Inspector, Amalapuram dated 21.7.77.
6. The offender is produced before you through the Rev. Inspector Amalapuram for taking in to custody.

Enclosed as stated above.

IN THE COURT OF THE JUDICIAL MAGISTRATE OF THE I CLASS KOTHAPETA.
PRESENT: SRI D. VENKATAMARAYANA, B.Com., LL.B., Judicial Magistrate
of the I Class.

TUESDAY, the 27th day of November, 1979.

C.C.No. 13/79.

Between:

The State of Andhra Pradesh, through

The State Inspector of Police, Razole
Cr.No.53/79 of Ravulapalem P.S.

.. Complainant.

and

Inlapati Gangadhara Rao,
s/o Pullayya, Aged 19 yrs.
Merlapalem.

.. Accused.

This case coming on 20.11.79 for hearing before me in the presence of the State Complainant and the accused appearing in person and having stood over for consideration till this day, the court delivered the following:-

JUDGMENT

The Inspector of Police, Razole has laid the charge sheet in Cr.No.53/79 of Ravulapalem Police Station Under Sections 420, and 471 IPC against the accused herein.

2. The case of the prosecution is that P.W.1 is resident of Merlapalem village and she is living in a house constructed in R.S.No.129 in Merlapalem village which was given to her by the Revenue Department. There is a tamarind tree in the said house site near her house. The branches of the said tree were over-hanging on her house endangering safety to her house. She was advised to apply for patta of the said tamarind tree. The accused who had come to know about it approached P.W.1 two weeks prior to 21.7.77 and offered his services to get the tree or patta for her and he induced her to affix her thumb impression on the application written by him and wanted her to get the recommendations of the Village Munsif and Revenue Inspector, Atreyapuram. When she expressed her inability to secure their signatures he resorted to forging of the signatures of village Munsif, Merlapalem and Revenue Inspector (P.W.4) completing the application and the recommendation. He presented the application in the taluk Office,

examined for verification and enquiry on 21.7.77, contacted P.W. 1 to ask also questions the accused at the village chavidi of Ryali before whom the accused admitted the offence and P.W.4 recorded the statements of P.W.1 as the accused. The accused was produced before the Tahsildar, Kothapeta who forwarded the accused to the Police Station, Ravulapalem along with Exs. P1 to P4. The police, Ravulapalem registered Cr.No.53/77 U/s. 420, 467 and 471 IPC. Therefore, the accused is liable for punishment under sec. 420, 467 and 471 IPC.

3. The case was taken on file against the accused under sec. 420, 467 and 471 IPC. When the accused appeared before this court, copies of documents contemplated under sec. 207 Cr.P.C. were furnished to him and he was examined on the contents of the documents. He denied the offence. On consideration of the documents, a charge under sec. 420, 467 and 471 IPC were framed, read over, interpreted and explained to the accused in Telugu to which he pleaded not guilty and claimed to be tried.

4. The prosecution, in support of its case, examined P.W.1, who writes to apply patta of the tamarind tree, P.W.2 the village head, Ryali, P.W.3, Village Kanna of Ryali, P.W.4 the Revenue Inspector in whose presence the accused is alleged to have confessed the offence, P.W.5 the Head Constable who registered the crime. P.W.6 the Investigating Officer, P.W.7, the Tahsildar who forwarded the accused and report of P.W.4 to Ravulapalem P.S. and got marked Ex. P1 to P6. The accused did not adduce any oral or documentary evidence.

5. After closure of the prosecution evidence, the accused was examined U/s. 313 Cr.P.C. regarding the incriminating circumstances appearing in the evidence of the prosecution against the accused. The plea of the accused is total denial of the offence.

He stated that P.W.4 is superstitious and fanatic and that when P.W.4 was telling about god once he told him that human being was born from monkey. Therefore, P.W.4 grew wild in that connection

is that he was beaten by P.W.4 and others and he was forced to put his signature on Ex.P3 and also Ex.P2. Further, the plea of the accused is that there was altercation between him and P.W.4 with regard to the existence of God and also with regard to obtaining of signature of P.W.4 on the caste certificate. Except, the confession statement of the accused Ex.P3 before P.Ws. 2 to 4, there is no direct evidence to connect the accused with the offences charged against him. P.W.4 is an illiterate. She does not know on which paper the accused obtained her thumb impression. Even for a moment sake, it is presumed that it is the accused who obtained the signature of P.W.1, on Ex.P1, Ex.P1 itself is completely in torn condition and the Tehsildar, Kothapeta who is competent authority to grant patta of the tamarind tree, would not have acted upon the petition Ex.P1. Moreover, the prosecution failed to explain the reason why the accused forged the signature of P.W.4 and the Village Munsif, Merlapalem on Ex.P1 and by forging the signature what is the wrongful gain the accused wanted to obtain. There is no evidence to show that it is the accused who filed Ex.P1 petition and other enclosures in the Tehsil Office, Kothapeta. Further, there is a typed petition filed in this case which contains the recommendation of the Village Munsif and the recommendation of Revenue Inspector-P.W.4. It is not marked by prosecution. To support a conviction U/s. 467 IPC, there must be evidence that the document is a false document, within the meaning of section 464 IPC and that it was forged by the accused with some intent mentioned in sec. 463 IPC. It is not sufficient that some possible intent may be inferred from the facts, it is necessary such intent should be established by evidence, which is lacking in this case. Under Sec. 420 IPC, there must be evidence that the person deceived delivered to someone, or consented that some person shall retain certain property, that the person deceived was induced by the accused to do as above, that such person acted upon such inducement in consequence of his having been deceived by the accused, that the accused acted fraudulently

and that subsequently when he approached P.W.4 to sign on the caste certificate, he demanded Rs. 10/- from him and that subsequently he reported the matter to the Revenue Divisional Officer, Amalapuram about the demanding of illegal gratification of P.W.4. The R.D.O. Amalapuram has promised to enquire into the matter. Therefore, this case is falsely foisted against him. When he was coming from Ravulapalem the Village servant took him before P.W.4. Thereafter he was ~~kept~~ taken to village chavidi where P.Ws. 1 to 4 were present and they beat him and obtained his signature on Ex.P3 and subsequently he was taken to the Pansilgar, Kothapeta from there he was sent to Police Station, Ravulapalem and that he is innocent and he did not commit any offence.

6. The point for consideration is whether the prosecution has been able to establish its case against the accused, beyond all reasonable doubt?

7. The case of the prosecution is that the accused forged the signature of P.S.4 the Revenue Inspector and Village Munsif, Merlapalem (who is no more alive). Ex.P1 is the petition which contains the alleged forged signatures of Village Munsif, Merlapalem and Revenue Inspector (P.W.4). Ex.P1 is in torn condition. The alleged signature of Village Munsif, Merlapalem is completely torn and the signature of P.W.4 is also torn completely except some portion. It also contains the thumb impression alleged to have been affixed by P.W.1. The prosecution to establish that it is the accused who is responsible for the alleged forgery of signatures of P.W.4 and Village Munsif, Merlapalem relies on Ex.P1 petition and Ex.P2 the slip which is also alleged to have been signed by the accused in the presence of P.Ws. 2 to 4. There is no direct evidence available, in this case, who witnessed the forging of the signatures of P.W.4 and Village Munsif, Merlapalem. Even the alleged signatures are in torn condition. Regarding the statement of the accused recorded by P.W.4 in the presence

dishonestly when so inducing that person, that the accused so induced that person intentionally, that such act of the accused was likely to cause damage or harm to that person in property. There must also evidence of fraudulent or dishonest intention at the time of the omission of the act in respect of which the cheating is alleged. Since the main part of the alleged signatures of P.W.4 and Village Munsif, Merlapalem (who is no more) are completely torn and Ex.P1 is in such a condition that the Tansildar, Kothapeta would not have been acted upon it in granting patta of the tamarind tree to the petitioner i.e., P.W.1. Therefore the question of commission of offences of cheating and thereby dishonestly inducing delivery of property, forgery of a valuable security or authority to make transfer any valuable security and using a genuine a forged document which is known to be forged are not proved against the accused, beyond all reasonable doubt.

In the result, the accused is given the benefit of doubt. The accused is found not guilty of the offences punishable Under sections 420, 467 and 471 IPC. and he is acquitted Under sec. 248(1) Cr.P.C.

Dictated to the Shorthand-writer, transcribed by him, Corrected by me and pronounced in Open Court on this the 27th day of November, 1979 in the presence of the accused.

9th December, 1988.

Dear Shri Rao,

I have your letter dated 15th November, 1988,
enclosing a petition from Shri Gangadhara Rao
Irlapati.

2. I will try to help.

Yours sincerely,

(K.R. NARAYANAN)

Shri A.J.V.B. Maheswara Rao,
Member of Parliament (LS),
43, North Avenue,
New Delhi.

Hyderabad,
Date:03-06-1989

To

The Director General,
Council of Scientific and Industrial Research,
Rafi Marg, New Delhi-I.

Sir,

Sub: Invention of Geoscope - Requested for further
research and development at the National Geophysical
Research Instituted - Reg.

- Ref: 1) Letter dated: 03-12-1987 of A.J.V.B.M. Rao,
Member of Parliament (LS), Amalapuram.
- 2) Letter No.401/VIP/MOS/88 Dated:8th December,1988
of Sri K.R.Narayanan, Minister of State Science
& Technology, New Delhi.

I am a poor scientist with an ideal to serve the Country
through Scientific research. I have invented and built a
small Geoscope at my house which can help to study the
underground.

Geoscope is a simple and wonderful invention. A borehole
having suitable width and depth has to be ~~dig~~ dug. An
Observatory having research and analysis facilities has to be
constructed on the borehole various ~~research facilities~~
sensing apparatus to recognize the geophysical and geochemical
changes generated in the underground should be inserted into
the underground through the borehole and linked with the
concerned analysis departments of the observatory that is
above the ground to study the changes taking place in the
underground.

Kindly provide research facilities to carryout further
researches on the Geoscope project at N.G.R.I. Hyderabad.

Gangadhara Rao Irlapati
C/o. R. Mohana Rao,
Saibaba Nagar,
Jeedimetla,
Hyderabad, AP.

G. Gangadhara Rao

In the High Court of Judicature of Andhra Pradesh at Hyderabad.
Special Original Jurisdiction

Wednesday the Sixth day of September
One thousand nine hundred and eighty nine

Present

The Hon'ble Mr. Justice Lakshmana Rao

Writ Petition No.12355 of 1989

Between:

Irlapati Gangadhara Rao.

..

Petitioner

And

1. Union of India, rep. by its Secretary,
Ministry of Science & Technology, Anusandhana
Bhavan, Rafi Marg, New Delhi-1.
2. Council of Scientific & Industrial Research,
rep. by its Director General, Rafi Marg, New Delhi-1.
3. National Geophysical Research Institutes rep.
by its Director, Tarana, Hyderabad. .. Respondents.

Petition under Art. 226 of the Constitution of India praying
that in the circumstances stated in the affidavit filed herein the
High Court will be pleased to issue an appropriate writ or order or
direction declaring

- i) that the inaction of the respondent authorities in not
considering petitioner's representations for carrying out
research and scientific investigations as arbitrary,
unreasonable and illegal;
- ii) a direction may be issued to the respondents 2 & 3
to consider the petitioner's representations so as to
enable him to carry out scientific investigations in
respondent 3 institution, or any such other appro-
priate direction may be passed;
- iii) Costs be awarded to the petitioner;

For the Petitioner : Mr. K. Ramesh Krishna Reddi, Advocate

For the Respondents : Mr. S. Venkateswara Rao, S.O. for Central Govt.

The Court made the following: ORDER

Heard the learned counsel for the petitioner as well as the
learned Standing counsel for the Central Govt. appearing on behalf
of the respondents.

The relief sought for in this writ petition is a direction
to the respondents to consider the respondent representations
submitted by the petitioner to ~~xxxx~~ provide facilities to enable him
to carry out scientific investigations in National Geophysical
Research Institute, Hyderabad and pass appropriate orders thereon.

Having regard to the facts and circumstances of the case, ~~if~~
it is directed that the respondents shall consider the representation
dated 3-6-89 submitted by the petitioner and pass appropriate orders
thereon as early as possible preferably within three months from the
date of receipt of a copy of this order.

The writ petition is accordingly disposed of. No costs.

DO No.....

DO No. NHRF/SKH/30/94

Date.....

Dated: 17.8.1994

Dear Dr. Naidu,

Please refer to your letter No. 1152/ADB/2/94 dated May 19, 1994 addressed to Cabinet Secretary forwarding representation of Shri I. Gangadhara Rao, Junior Assistant in the Andhra Pradesh Public Service Commission regarding his claim of invention of a peculiar scale for forecasting cyclones, heavy windy rain, earthquakes and all other natural calamities 10 days in advance.

We appreciate the attempt made by Shri Gangadhara Rao in developing a weather scale using a complete new approach. However you will agree that a weather forecasting scheme ought to have some scientific basis and be capable of delivering results independent of an individual observer. Since the scale developed by Shri Rao uses eye as an instrument, whose property and efficacy varies from person to person as also from age to age of the observer, it can not be a reliable tool for the purpose. Studies in geomagnetism establish no relationship between the occurrence of cyclones and change in geomagnetic field. Further, the forecast is expected to be valid for an area of 100 to 1500 kms around the point of observation. The range being so wide, it is doubtful if such a forecast, even if true, can serve any worthwhile purpose like fore-warning the people in the affected area, taking any precautionary measure or planning any emergency relief without creating panicky conditions.
